## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Taiwan 092215809 on 09/01/2003. It is noted, however, that applicant has not filed a certified copy of the Taiwan 092215809 application as required by 35 U.S.C. 119(b).

### ***Oath/Declaration***

2. A new oath or declaration is required because it is not signed by the applicant.

### ***Specification***

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).

"Microfiche Appendices" were accepted by the Office until March 1, 2001.)

(f) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(g) BRIEF SUMMARY OF THE INVENTION.

(h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(i) DETAILED DESCRIPTION OF THE INVENTION.

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

(k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

**Applicant should include the PART LIST ON FIGURES (paragraphs 0049-0112) in an appendix at the end of the specification.**

***Claim Objections***

4. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not). Misnumbered claims (5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15) have been renumbered (4, 5, 6, 7, 8, 9, 10, 11, 12, 13 and 14).

***Claim Rejections - 35 USC § 112***

5. Claims 1-3 and 5-15 (renumbered 1-14) are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a

Art Unit: 2841

manner as to present a complete operative device. ***The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.***

In claim 1, line 3, there is no antecedent basis for the "all-in-one-computer." Applicant could state, for example, "...with dual LCD monitors, the all-in-one-unit comprising two major parts, CASE A and CASE B, wherein CASE A includes.... ." In line 11, "raise card" should be corrected as "riser cards." In lines 11-13, applicant should clarify what is meant by "two PCI extension raise card/ PCI extension cable/PCI extension slot, two CPU heat outlet fans, three power supply inlet fans and three system heat outlet fans." It is not clear what components applicant is intending to claim and their specific incorporation into CASE A. In line 14, applicant should clarify the incorporation of the LCD monitor into CASE A. In line 16, there is no antecedent basis for "the first hard disk drive" or "the second hard disk drive." In line 18, "drive" should be "drives." In line 22, applicant should clarify which center is intended. There is no antecedent basis for "the system." Applicant should clarify the interrelation of the various fans. It is not clear which fans are providing each cooling function. In lines 24-26, applicant should clarify the structure intended by "also on upper panel are a set of holes that receives cold air for CPU." In line 26, there is no antecedent basis for "for CPU."

In claims 2-3 and 5-15 (renumbered 2-14), applicant should clarify what is meant by "a gadget according to claim 1." Claim 1 seems to define an "all-in-one unit."

In claims 2-3 are not further limiting. Applicant has not defined any additional structure.

Art Unit: 2841

In claim 5, applicant should clarify where the "second hard disk drive rack" is mounted.

Claim 6 is not further limiting. Applicant claims the CD/DVD-ROM rack in line 5 of claim 1.

In claim 7, applicant should clarify the mounting of the "second CD/DVD-ROM rack."

In claim 8, applicant should clarify what is intended to be claimed. It is not clear what component is claimed or where it is mounted.

In claim 9, applicant should clarify the mounting of the fans relative to the fans claimed in lines 14-24 of claim 1.

In claim 10, applicant should clarify what is meant by a "printer set."

In claim 11, applicant should clarify what is meant by a "scanner set."

In claim 12, applicant should clarify what is meant by a "webcam set."

In claims 13-14, applicant should clarify what is intended to be claimed. Applicant has not claimed any additional structure or arrangement.

Claim 15 is not further limiting. Applicant claims CASE A and CASE B forming an all-in-one unit in claim 1.

### ***Double Patenting***

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re*

Art Unit: 2841

*Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

7. Claims 1-3 and 5-15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3 and 5-15 of prior U.S. Patent No. 10/707682. This is a double patenting rejection.

8. Claims 1-3 and 5-15 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3 and 5-15 of copending Application No. 10/707682. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Kim et al. [US 6,142,593] discloses a docking station with adjustable guide rails;
- Provenzale [US 5,267,873] discloses an inter-box coupling between machine modules; and
- Krah [US 2005/0201047] discloses a web cam mounted on a portable computer.
